

Si-30

PISTON PUMP

Versatile technology

The high performance Si-30 is suitable for air-conditioning units **up to 20 kW**.

The piston technology is specifically designed for removing condensates from air conditioning systems. The Si-30 is fully reliable, in any kind of environment. Its operating sound level will remain silent whatever the volume of condensates.

BENEFITS

• « Sauermann inside » : Patented technology

- **Increased performance:** Only one pump, for air conditioning unit up to 20 kW
- **High resistance to pollution** created by general environment. Capable of discharging small particles.
- **Proven Reliability.**
- The **Drain Safe Device** retains prime and prolongs the pump life.

• Silent

- Quiet in operation: **20 dBA independently tested.**
- The size of the air-conditioning unit and volume of condensates to be removed does not affect the operational sound level of the pump.
- **Mounting bracket** specifically designed to **reduce vibration transmission to the wall / panel or pipework.**

• Easy to install

- **Compact design.**
- Mounting bracket: allows the pump to be **wall mounted or hung from ceilings and pipework.**
- **Lockable plug-in power cord** to avoid unintended disconnection.

• Energy saving

Improved performance and high flow rate **reduce operation time** and energy consumption.
